

## COVID-SECURE CAR SHARING

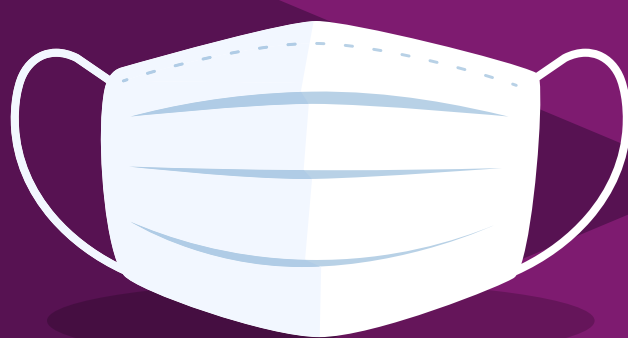

### 01 Symptoms

Don't enter a vehicle if you have symptoms. Book a COVID-19 test and isolate.

### 02

#### Wear a mask

If you're sharing a vehicle with others outside your bubble, you need to wear a mask. No exceptions.

### 03

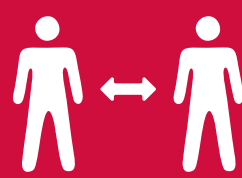

#### Wash your hands

Sanitise your hands before you get into the car, and after you leave the car.

### 04

#### Keep windows open

This will help reduce the risk of transmission.

### 05

#### Maintain space

Everyone should sit as far apart as possible. Under no circumstances should you have more than five passengers.

### 06

#### No singing

We understand the urge to sing, particularly on long drives. However, shouting and singing increase the risk of transmission, so keep your lips sealed.

### 07

#### Clean hot spots

As a passenger, avoiding touching any areas of the car that you don't need to touch. Clean high contact points such as door handles.
